1. Scope of work

- **Great Fish River Nature Reserve**

- Lucerne to be delivered to stores situated on the reserve. The main entrance gate of the reserve is approximately 35 km from Grahamstown and lucerne stores a further 4 km. Road surface is gravel from main entrance gate and road quality is fair to good.

- **Oviston Nature Reserve**

- Lucerne to be delivered to stores situated on the reserve, approximately 5km from Venterstad. The road surface is tar for almost all the way. The road varies in condition from average to poor once in the reserve. Access to the storage facility is difficult with larger trucks and thus a smaller truck is recommended

- **Mpofu Nature Reserve**

- Lucerne to be delivered to stores situated on the reserve, approximately 25 km from Fort Beaufort. The road surface is gravel for the last few kilometres and the road quality is fair to good.

Service providers will be expected to provide the following estimated quantities on Grade 1 lucerne during the 3-year period (please note these numbers are indicative and may fluctuate based on conditions and approved off-takes – bidders should not bank on these amounts):

Estimated Quantities (May increase/decrease)				
Year	Great Fish River Nature Reserve	Oviston Nature Reserve	Mpofu Nature Reserve	Total
2023	500	500	500	1500
2024	500	500	500	1500
2025	500	500	500	1500

Table 1: annual delivered of the Reserves.

Month	Number of Bales to be delivered yearly	Destination Reserve
April/May OR as per agreement	1500 per year	Great Fish, Mpofu and Oviston

Table 2: delivery schedule for year 1,2,3

1.1. Labour

Hand labour used for off-loading must be sourced locally from employees adjacent to the reserve. This will be numbered and selected by the operator and reserve manager. This will be at the cost of the successful bidder.

1.2. Lucerne Quality

- Bales should be standard rectangular 22-24kg – square bales – round bales are impossible for boma staff to separate – it needs to be small enough to handle by hand
- Bales must have a rich green colour, contain ample leafy material and less stalks proportionately
- Bales must be fastened with wire or twine
- Bales should not contain toxic plants or weeds
- Bales should not contain any mould

Bales not delivered of the desired quality stipulated above shall be collected by the supplier at their own cost and replaced with suitable quality lucerne within 48 hours of instructed return of bales.

2. Competencies Required

- Potential Service Providers should be able to provide between 1000 and 2500 good quality Grade 1 lucerne, in the quantities stipulated above, during April, May, and occasionally June and July or any period as may be agreed upon. It is anticipated that the first load of lucerne will be required by April 2023.

- Furthermore, potential service providers should have suitable and reliable transport to deliver the lucerne to all three reserves. Special care must be taken of previously delivered amounts to each reserve – this will need to be factored in to price calculations if more than one load is required.
- Service providers should be able to deliver at least 1 000 bales of lucerne initially and the balance thereafter as required – this may mean spreading the deliveries over a three/four month period. This can be negotiated with the successful service provider.
