1. EASTERN CAPE OVERVIEW

THE BEAUTIFUL EASTERN CAPE Located in this rich country, the Eastern Cape is the second largest province, accounting for 13,9% of the total area. Gqeberha, situated on Algoa Bay, is the largest city in the Eastern Cape and the seat of Nelson Mandela Bay Municipality. The provincial capital, Bhisho, is located within the Buffalo City Metropolitan Municipality, as are East London and King William's Town. Other important towns in the Province include Mthatha, Kariega and Grahamstown. Administratively, the Eastern Cape is carved into 37 local municipalities, located within six districts. In addition, there are two metropolitan municipalities. From a tourism perspective, the Province is divided into regions and routes. These have no regard for administrative boundaries, but are rather based on regional qualities and experiences

CLIMATE

The weather in the Eastern Cape is good to visitors, rarely reaching extremes, except perhaps in the height of the Karoo summer.

The coastal area of the Eastern Cape Province lies directly between subtropical KwaZulu Natal and the Mediterranean Western Cape. Its inland area is bisected by the great escarpment, and the northern areas have altitudinous plains of the Plateau and great Karoo.

These topographical differences are what cause the climatic differences and conditions experienced by the various towns and cities.

In the North East along the Wild Coast, towns like Port St Johns experience long, hot, balmy conditions and high rainfall, while Graaff Reinet, in the heart of the Karoo Heartland, experiences long hot summer months and moderate winters.

Up towards the Free State (at towns such as Lady Grey and Aliwal North) the rise in altitude means the appropriate lowering in temperature and sometimes snow.
