

APPENDIX F: PUBLIC PARTICIPATION -

(i) Advert

NOTICE FOR APPLICATION FOR AN ENVIRONMENTAL AUTHORISATION:

PROPOSED INFRASTRUCTURE DEVELOPMENT AND UPGRADES WITHIN THE GREAT FISH RIVER NATURE RESERVE, MAKANA LOCAL MUNICIPALITY, RAYMOND MHLABA LOCAL MUNICIPALITY AND NGQUSHWA LOCAL MUNICIPALITY, EASTERN CAPE PROVINCE

DEFF REF: *PENDING*

Notice is hereby given in terms of Regulation 41 (2) published in GN R. 982 (as amended by GNR. 326) under Chapter 6 of the National Environmental Management Act (NEMA) (Act No. 107 of 1998, and subsequent amendments), Environmental Impact Assessment (EIA) Regulations (2014, as amended in 2017), of the intent to carry out an application for Environmental Authorisation for proposed infrastructure development and upgrades (staff housing, improving access to the fence line, refurbishing runways, upgrading of internal roads and existing dams, etc.). The proposed development and upgrades trigger Listed Activities in Listing Notice 1 (GN R. 983, as amended by GN R. 327) and Listing Notice 3 (GN R. 985, as amended by GN R. 324) of the EIA Regulations, 2014 (as amended in 2017), and therefore requires Environmental Authorisation, subject to a **Basic Assessment** process. In addition, a Section 21 **Water Use Authorisation Application** will be applied for in terms of the National Water Act (Act No. 36 of 1998). The Applicant, the Eastern Cape Parks and Tourism Agency, has appointed JG Afrika (Pty) Ltd as independent Environmental Assessment Practitioners to undertake the required environmental services.

Once the Draft Basic Assessment Report has been completed, all **registered Interested and Affected Parties (I&APs)** will be notified of the availability of the reports for public review.

To register as an I&AP for the said Basic Assessment process, please contact the undersigned via e-mail, post or telephone.

NOTICE OF ENVIRONMENTAL AUTHORISATION PROCESS

PROPOSED INFRASTRUCTURE DEVELOPMENTS AND UPGRADES IN THE GREAT FISH RIVER NATURE RESERVE, WITHIN THE MAKANA LOCAL MUNICIPALITY, RAYMOND MHLABA LOCAL MUNICIPALITY AND NGQUSHWA LOCAL MUNICIPALITY, EASTERN CAPE PROVINCE

Notice is hereby given in terms of Regulation 41(2)(a) of the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA), published in Government Notice (GN) R. 982 (as amended by GN R. 326) (2014, as amended) of the intent to carry out an application for Environmental Authorisation (EA) for the above-mentioned proposed development. In addition, a Section 21 Water Use Authorisation Application will be applied for in terms of the National Water Act (Act No. 36 of 1998).

The proposed development and upgrade works are to consist of the following: new staff housing and associated water and sanitation services; improving access to the fence line; installation of gabions and culverts; refurbishing a runway; upgrading of internal roads; upgrading of existing dams and decommissioning of unwanted dams; and pipeline infrastructure associated with existing boreholes.

The proposed development triggers Listed Activities in Listing Notice 1 (GN R. 983, as amended by GN R. 327) and Listing Notice 3 (GN R. 985, as amended by GN R. 324) of the Environmental Impact Assessment (EIA) Regulations (2014, as amended), and therefore, requires Environmental Authorisation subject to a **Basic Assessment** process.

Proponent: Eastern Cape Parks and Tourism Agency (ECPTA)

Environmental Assessment Practitioner: JG Afrika (Pty) Ltd

Competent Authority: National Department of, Forestry and Fisheries and the Environment (DFFE)

In accordance with Regulation 41(2) of the afore-mentioned legislation, the public is hereby notified of the application process for Environmental Authorisation (EA). Persons wishing to have input into, or remain informed about the project, are invited to submit a written request for registration as an Interested and Affected Party (I&AP), to the representative listed below. All I&APs are requested to submit their name, full contact details, a disclosure of their interest in the project and any initial concerns or queries they may have regarding the proposal. Upon registration, additional information pertaining to the proposed project will be provided.

EASTERN CAPE PARKS AND TOURISM AGENCY
PROPOSED INFRASTRUCTURE DEVELOPMENT AND UPGRADES IN THE GREAT FISH
RIVER NATURE RESERVE
BACKGROUND INFORMATION DOCUMENT

1 INTRODUCTION

JG Afrika (Pty) Ltd has been appointed by the Eastern Cape Parks and Tourism Agency (ECPTA) to apply for Environmental Authorisation (EA) for the proposed infrastructure development and upgrading works in the Great Fish River Nature Reserve (GFRNR) located within the Makana Local Municipality, Raymond Mhlaba Local Municipality as well as the Ngqushwa Local Municipality of the Eastern Cape Province.

2 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The following activities will form part of infrastructure development and upgrades:

- a) Perimeter fence and perimeter road (jeep track) and associated gabion structures:
 - Repair and maintenance to sections of the perimeter fence around the reserve;
 - **A new 3m wide and approximately 100km long road (jeep track) running along the perimeter fence where currently no road exists; and,**
 - **Installation of new gabions structures along this perimeter track.**

- b) Internal roads and associated culvert and/or gabion structures:
 - **Upgrading of sections of the existing internal gravel road network measuring approximately 3m wide and with a cumulative length of approximately 75km;**
 - **Installation of new culverts and/or gabions along the internal road alignment; and,**
 - **In addition, a few sections of new road will also be developed to connect to the existing road sections along the alignment. The width will not exceed 3m.**

- c) Dams and pipeline infrastructure associated with existing boreholes:
 - **Upgrading of three (3) existing dams at Botha's Post, Ballysaggart and Inkerman. Each of these dams have a current capacity not exceeding 600kℓ. Once upgraded by means of excavation, each dam will have a new capacity of approximately 2 000kℓ. The height of each dam wall, after upgrading, will not exceed 5m;**
 - **Decommissioning of eleven (11) unwanted dams by removal of dam walls and the earth to be spread over the area of the dams; and,**
 - *Installation of new pipeline infrastructure associated with three existing boreholes. Water pipelines will be installed between the boreholes and existing dams to be upgraded. Such pipelines will not be larger than 0.065m in diameter. Location of these pipe alignments must still be confirmed but will be placed along existing roads and tracks where possible.*

- d) Airfields (runway) strips:
 - Refurbishment of the airfield (runway) strips at Kamadolo and Double Drift; and,
 - **The Kamadolo airfield strip will also be extended by 100m x 15m, thereby increasing the footprint of the airfield by 1 500m² (0.15ha).**

- e) Accommodation units:
 - **Construction of a security manager's house (approximately 160 m² in size) and installation of twelve (12) modular field ranger accommodation units (approximately 42 m² each) distributed**

into three (3) clusters of four (4) units each. The required services in terms of water and sanitation will be installed. The accommodation units will be using septic tanks and French drains. The cumulative length of the water and sewage pipelines will not exceed 1km and will have a diameter less than 0.065m. A single 6,000ℓ tank would suffice for each cluster, while a 1,750ℓ tank will be installed for the security manager's house.

- f) Workshop and fuel storage:
- The development of a fuel storage facility and vehicle workshop to be located right next to each other with a combined footprint of approximately 280m². The volume of fuel to be stored at the proposed storage facility will be approximately 5m³.

3 LEGISLATIVE REQUIREMENTS

The proposed development and upgrading trigger Listed Activities contained in the Environmental Impact Assessment (EIA) Regulations, 2014) (as amended), promulgated under the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and published in GN R 327 (983) and R 324 (985).

It should be noted that not all of the above infrastructure components listed in Section 2 above will require an EA. Only those components indicated in **bold** trigger Listed Activities. This applicable development and/or upgrading activities are set out in Table 1 and will thus require an application for Environmental Authorisation (EA) in terms of the NEMA: EIA Regulations.

Table 1: Summary of Listed Activities triggered by the proposed development. Strikethrough text indicates those sub-sections of the Listed Activity that are not applicable to the proposed development.

| ACTIVITY AND NOTICE NUMBER | LISTED ACTIVITY | DISCUSSION IN TERMS OF APPLICABILITY |
|--|---|--|
| <p>Activity 12 Listing Notice 1 of GNR. 327 (983) (2014 EIA Regulations as amended)</p> | <p>The development of— (i) dams or weirs, where the dam or weir, including infrastructure and water surface area, exceeds 100 square metres; or (ii) infrastructure or structures with a physical footprint of 100 square metres or more;</p> <p>where such development occurs— (a) within a watercourse; (b) in front of a development setback; or (c) if no development setback exists, within 32 metres of a watercourse, measured from the edge of a watercourse; —</p> <p>excluding— (aa) the development of infrastructure or structures within existing ports or harbours that will not increase the development footprint of the port or harbour; (bb) where such development activities are related to the development of a port or harbour, in which case activity 26 in Listing Notice 2 of 2014 applies; (cc) activities listed in activity 14 in Listing Notice 2 of 2014 or activity 14 in Listing Notice 3 of 2014, in which case that activity applies;</p> | <p><u>Perimeter fence and perimeter road (jeep track) and associated gabion structures:</u> The establishment of a jeep track as well as the installation of gabion structures along the road and perimeter fence will exceed the cumulative footprint of 100m² and works will occur both within and within 32m of watercourses. This Listed Activity is therefore TRIGGERED.</p> <p><u>Internal roads and associated culvert and/or gabion structures:</u> The development of new sections of the internal road as well as the new culvert / gabions structures to be installed will exceed the cumulative footprint of 100m² and these works will occur within low lying areas and so will occur both within and within 32m of watercourses. As such, this Listed Activity is TRIGGERED.</p> |

| ACTIVITY AND NOTICE NUMBER | LISTED ACTIVITY | DISCUSSION IN TERMS OF APPLICABILITY |
|--|--|--|
| | <p>(dd) where such development occurs within an urban area; (ee) where such development occurs within existing roads, road reserves or railway line reserves; or (ff) the development of temporary infrastructure or structures where such infrastructure or structures will be removed within 6 weeks of the commencement of development and where indigenous vegetation will not be cleared.</p> | |
| <p>Activity 19 Listing Notice 1 of GNR. 327 (983) (2014 EIA Regulations as amended)</p> | <p>The infilling or depositing of any material of more than 10 cubic metres into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 10 cubic metres from a watercourse; but excluding where such infilling, depositing, dredging, excavation, removal or moving— (a) will occur behind a development setback; (b) is for maintenance purposes undertaken in accordance with a maintenance management plan; (c) falls within the ambit of activity 21 in this Notice, in which case that activity applies; (d) occurs within existing ports or harbours that will not increase the development footprint of the port or harbour; or (e) where such development is related to the development of a port or harbour, in which case activity 26 in Listing Notice 2 of 2014 applies.</p> | <p><u>Perimeter fence and perimeter road (jeep track) and associated gabion structures:</u> The installation of gabion structures along the road and perimeter fence will involve the excavation, removal and/or moving of material (soil) of a cumulative volume of more than 10 m³ from watercourses. This Listed Activity is therefore TRIGGERED.</p> <p><u>Internal roads and associated culvert and/or gabion structures:</u> The development of new sections of the internal road as well as the new culvert / gabions structures to be installed will involve the excavation, removal and/or moving of material (soil) of a cumulative volume of more than 10 m³ from watercourses. This Listed Activity is therefore TRIGGERED.</p> <p><u>Dams to be upgraded:</u> The proposed activity of expanding 3 existing dams will involve the dredging, excavation, removal or moving of soil of more than 10 m³ for each dam. As these dams are considered ‘watercourses’, this Listed Activity is TRIGGERED.</p> <p><u>Dams to be closed:</u> The proposed activity of closing 11 unwanted farm dams will involve earthworks by bulldozer, removal of the dam walls and the earth to be spread over the area of the dams. The dams are considered ‘watercourses’, and the closing of the dams will include the moving of soil. As such, this Listed Activity is TRIGGERED.</p> |
| <p>Activity 48 Listing Notice 1 of GNR. 327 (983)</p> | <p>The expansion of – (i) infrastructure or structures where the physical footprint is expanded by 100 square metres or more; or (ii) dams or weirs, where the dam or weir, including</p> | <p><u>Internal roads and associated culvert and/or gabion structures:</u> The existing sections of road will not be widened but will be lengthened / extended by more than 1km cumulatively to connect to each other. This extension constitutes an expansion activity. The extension of existing sections of road will exceed the</p> |

As the proposed development and upgrading both triggers, and potentially triggers, activities listed in Listing Notice 1 and 3, an application for Environmental Authorisation, subject to the undertaking of a Basic Assessment process is required. The application for EA will be conducted in accordance with the Regulations published in GN R 326 (982) as amended in 2017, promulgated under the NEMA, 1998 (Act 107 of 1998).

Moreover, Section 21 (a) – (k) contained within the National Water Act (NWA, Act No. 36 of 1998, as amended) describes activities defined as a water use under the Act. These activities may only be undertaken subject to the application for a Water Use Authorisation (WUA), and issue of, either a Water Use Licence (WUL) or General Authorisation (GA). The Competent Authority in this regard is the Department of Water and Sanitation (DWS).

A WUA is required for any construction activity within the extent of a watercourse or within 500 m of a wetland in terms of the following triggers from the National Water Act (No. 36 of 1998) - Section 21 (c) and (i). The relevant WUA must be obtained from the DWS prior to commencement of construction via the electronic Water Use Licence Application and Authorisation System (e-WULAAS) and must be made in accordance with the provisions of sections 40 and 41 of the Act. This application process will run parallel with the EA process.

4 PROJECT ROLE PLAYERS

The role players in the project are:

| | |
|--|---|
| APPLICANT | Eastern Cape Parks and Tourism Agency (ECPTA) |
| ENVIRONMENTAL ASSESSMENT PRACTITIONER | JG Afrika (Pty) Ltd |
| COMPETENT AUTHORITY | National Department of Forestry, Fisheries and the Environment (DFFE) |

5 PROJECT LOCATION

The GFRNR straddles the Great Fish River in the south-east of the Eastern Cape Province, and is located north-west of the N2, midway between Makhanda (Grahamstown) and King William's Town (Figure 1). The reserve falls within both the Sarah Baartman and Amathole District Municipalities. The GFRNR nestles between the steep river valleys and inter-basin ridges of the Great Fish River catchment area, characterised by dense, semi-succulent, thorny scrub or thicket and notable variations in topography and elevation. The central point co-ordinates of the project site are: Latitude: 33°06'38.55" S; Longitude: 26°49'41.83" E.

GFNR INFRASTRUCTURE DEVELOPMENT: LOCALITY

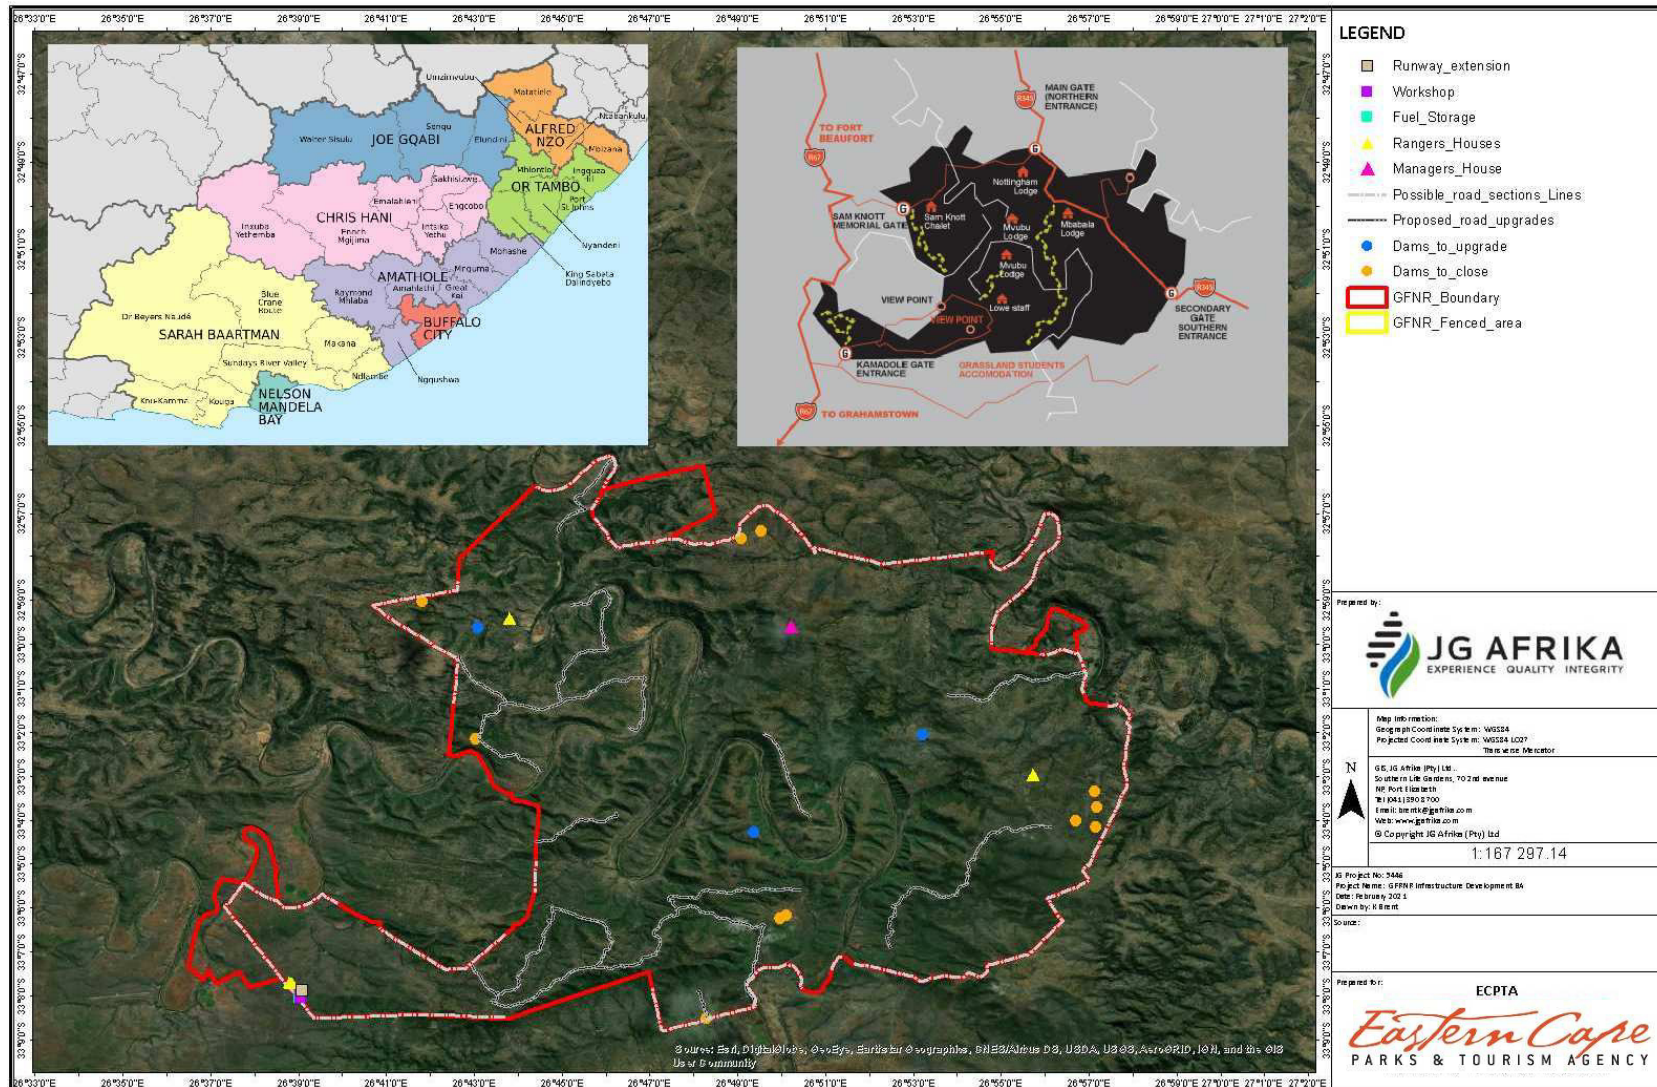

Figure 1: Locality map showing the study area, i.e. the Great Fish River Nature Reserve, wherein infrastructure is proposed to be developed and/or upgraded.

6 ENVIRONMENTAL SCOPE OF WORK

The required Basic Assessment process will be undertaken in accordance with the requirements of NEMA and the EIA Regulations, 2014 (as amended).

The Environmental Assessment Practitioner (EAP) is required to conduct the application and manage the public participation process, which is currently underway. As part of this process, JG Afrika (Pty) Ltd will perform the following:

1. Identify and notify key stakeholders, authorities and municipalities, environmental groups and neighbours, hereafter referred to as Interested & Affected Parties (I&APs);
2. Compile a detailed Background Information Document (BID) (this document) for the proposed development, providing details to I&APs of:
 - a. The listed activities that trigger the Environmental Authorisation process;
 - b. The scope of work;
 - c. The locality and current land use at the site;
 - d. A detailed site description;
 - e. The Basic Assessment process to be followed; and
 - f. The opportunity for I&APs to comment on the project.
3. Advertise the environmental application in a newspaper applicable to the region;
4. Place notification poster on and in the areas surrounding the site;
5. Obtain consent from the landowner to undertake the application process (if necessary);
6. Attend Public Liaison Committee (PLC) meetings and workshops, where necessary;
7. Host a Public meeting, if necessary, providing details of issues identified by the EAP, stakeholders and I&APs;
8. Record all comments of I&APs and present such comments, as well as responses provided by JG Afrika (Pty) Ltd, in a full Comments and Responses Report, for inclusion into the Basic Assessment Report, which will be submitted to DFFE for decision-making; and
9. Circulate all I&AP comments to the project team.

7 HOW DO I PARTICIPATE

The proposed development has the potential to significantly affect the natural, social and economic environments, both at, as well as in the areas surrounding the proposed site. For this reason, it is imperative that you, as a stakeholder or an I&AP, comment on the proposed project and **highlight any issues or concerns** that you feel need to be considered during the proposed planning and implementation processes.

Should you wish to register as an I&AP or should you have any comments regarding the proposed development, please **state your interest** in the proposed development along with any **comments or queries** you may have on the form provided.

Please return these comments, via e-mail, fax or post to the EAPs listed below, making use of the contact details provided:

EAP: Cherize Coetzee

Tel: 041 390 8700
