

**APPLICATION FORM FOR FILMING OR PHOTOGRAPHY IN EASTERN CAPE PARKS AND TOURISM AGENCY**

I/We the undersigned (the applicant) represented by (full names)

.....

Apply for filming/recording/photography rights in .....

Nature Reserve, managed by Eastern Cape Parks and Tourism Agency (ECPTA), and hereby agrees that these rights, once granted, are strictly subject to the conditions and regulations set out by ECPTA and by the relevant legislation.

We also agree that ECPTA reserves the right not to agree to any or all of the assistance or requests applied for.

We agree to provide one copy, free of charge, of the finished production or publication in which the said national park has been featured to ECPTA for the purposes of education and information only. ECPTA will not use this production or publication for public broadcast and will not charge a fee for the viewing of such a production.

We agree to acknowledge the national park above-mentioned, or Eastern Cape Parks and Tourism Agency whichever is deemed appropriate by ECPTA officials, in the published or broadcast version of the product created with this footage/material.

We agree to abide by the conditions set out in the National Environmental Management:

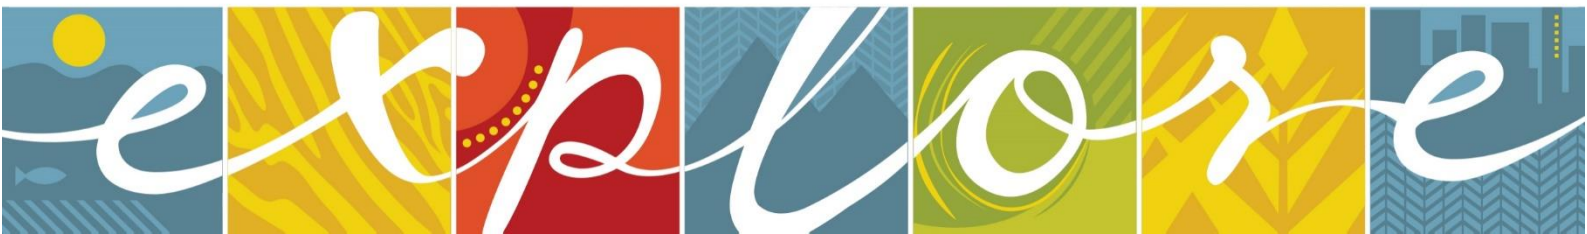

Protected Areas Act 57 of 2003 and regulations made in respect of this Act, as well as any rules and

regulations made by the Park Management. In particular the following shall apply:

- The instruction of ECPTA staff shall be complied with.
- No damage shall be permitted to any natural vegetation, environment, or property.
- No form of wildlife may be injured, fed or disturbed in any way.
- The ECPTA normal activities or business operations are not to be interfered with in any way.
- The use of accepted roadways only shall be permitted. Please ensure that the indicated speed limits are not exceeded.
- No off-road driving will be allowed.
- No parking shall be permitted in entrances to access roads. All vehicles parked in the rest camps shall be parked legally i.e., within demarcated parking bays and shall do not disrupt the use thereof by the general public.
- Strictly no fires, smoke machines or audible generators will be permitted.
- Visitors to the area may not be hindered in any way.
- The areas under the control of ECPTA are used entirely at your own risk and ECPTA shall not be liable for any claims, accidents, injuries, or loss, etc. arising from such use.

## Code of Conduct for Filmmakers/Photographers in National Parks

1. Never cause any physical harm or anxiety to any wild creature.

- Avoid using sound recordings to attract certain species for prolonged periods.
- Accept that the welfare of subjects is more important than the sequence.
- Ensure that filming does not result in the consequential predation or lessened reproduction success of the species involved.
- Vacate a scene immediately should subjects show signs of abnormal stress.
- Report the inhumane and illegal treatment of wild animals to the relevant authorities whenever it is encountered.
- In the case of predators, care should be taken not to disrupt its hunting techniques for prolonged periods so that it becomes impossible for the animal to feed itself adequately

2. Endeavour to leave the environment as it was found.

- Minimize interference in and the disruption of natural processes as far as possible.
- Cause minimal damage to the habitat.
- Stick to recognised roads and bush tracks wherever possible and not cause unnecessary vehicle damage to the bush.
- Do not traverse ecological sensitive areas in a vehicle.

3. Research their subjects properly before entering an area so that they fully understand the consequences of their actions on their surroundings.

- Strive to portray as accurately as possible authentic and natural behaviour.
- Make sure that all information included in films is accurate and scientifically justifiable.

4. As far as possible enlist the help and heed the advice of experts when dealing with natural history films.

- Possible after dark filming should be accomplished with no artificial lights and using only the latest approved technology in wildlife filming & photography.
- Spotlights for night filming should be covered with infra-red filters.
- Illumination of a subject at night should not result in the subject being killed or maimed

by predators in unnatural or unethical circumstances.

5. Forge good relationships with all officials and conservation bodies they have contact with
